

ROGERS
ENERGY SERVICES

Capability Statement

ABOUT US

Rogers Energy Services, RES is a family owned and operated civil contractor with a broad range of capability and a can-do approach to all situations that is reliable and cost effective.

Founded in 2016 the company's vision was to provide quality civil services to the energy industries including gas, power and its auxiliaries such as fibre optics.

With a team of highly skilled and experienced operators and supervisors, RES is a positive choice for any civil application. Backed by a qualified Project Engineer we provide support to clients ensuring a positive outcome.

THE ROGERS BRAND

JOEL ROGERS

A Project Engineer on predominantly gas pipelines. With experience in pipeline construction in most facets from Earthworks through to Hydrotesting.

GEOFF ROGERS

Over 30 years of pipeline and mechanical construction experience. Operating in South East Asia, Australia and the Middle East.

It is our belief that zero harm is achievable through a strong culture.

OUR CORE VALUES

SAFETY

On the forefront Rogers Energy Services is a family orientated company we know that at the heart of every employee, client or stakeholder is a family and as such we put safety as our priority.

ENVIRONMENT

Rogers Energy Services stands to protect the environment and minimize our impact. To achieve this we ensure that we comply completely to legislation and industry best practise.

QUALITY

Rogers Energy Services strives to produce the best quality products possible, we know that consistent quality is paramount to our clients and is part of our key business model.

PIT & PIPE

Rogers Energy Services works on many facets of the communications sector including;

- Communications Conduit installation
- Electrical Conduit Installation
- New Pit Installations
- Upgrade of Existing Pits
- Installation of Communications Cabinets

We strive to install with minimal impact to the environment and the overall aesthetics of a property whilst working in some of the most congested areas.

- Trenching
- Compaction
- Reinstatement
- Under Driveway Boring
- Concrete Breakout
- Concreting
- Bitument Breakout
- Bitumen Reinstatement
- Core Boring
- Asbestos Removal

BROWNFIELD EXCAVATION

Rogers Energy Services assists clients to expose, assess and rectify damage to their existing assets.

We have strong working relationships with coating and welding sub-contractors allowing us to be an all-encompassing contractor and still providing a high quality finish.

We will only use competent supervision, operators and ground staff to ensure a dig up is done as per the permit, best practise and most importantly safely. Giving asset owners peace of mind.

PROJECT MANAGEMENT

Rogers Energy Services have a strong project management basis backed by experience and education.

Depending on the clients needs we can provide a range of management services from a mobilization and onboarding through to the delivery of an entire project.
