| | Laser Level (enables better cut / site level and accurate slope / angles) | | | \$100 | | | |

Please note that all prices exclude GST.

¹ **Float rates** for equipment are valid for up to 30km from our base of operations (or from the previous job site – whichever works out best value for you). If float distance exceeds 30kms, an additional 90c per km charge will apply. Distances will be calculated using Google maps.

² **Over Tyre Tracks (OTTs)** are fitted from 1st of May through to 31st of August. Hire of Skid Steer during this period will automatically include OTT hire and hourly rate addition. If you have a job that will not require OTTs, please notify us in advance and we will remove them and subtract them from the cost of hire.

³ **Load content** will be charged as per determination of Waste Centre / Recycling Centre / Land Fill depot etc. Note that for mixed loads, there will be a 10% surcharge for separation and handling. For example, if a Waste Centre determines a load is 50% Concrete (recyclable) and 50% waste, then we will charge the following: \$275 for concrete and \$150 for waste + 10% of the total for handling.

⁴ **Ancillary equipment** or tools can only be hired in conjunction with equipment listed above (i.e. They are not available for Dry Hire).
