European quality...
proven in Australia.

NEW

Conplant is the sole Australian distributor for Ammann compaction equipment. Ammann is a Swiss based premium manufacturer with more than 140 years in the business. They produce more than 10,000 units each year, setting the standard in quality, technology and safety.

Our partnership with Ammann blends global strength and knowledge, Australian expertise and local support to give our customers the quality, technology and support they need to maximise productivity and safety.

Ammann's range includes Single Drum, Tandem, Multi Tyred, Trench and Combination Rollers as well as Rammers, Plate Compactors and Pavers.

With great standard factory warranty and a wide range of tailored extended warranty and service package options, we've got you covered. For more information, including equipment specifications and brochures, please visit our website conplant.com.au or contact us on 1300 166 166.

USED

We have a range of quality used compaction equipment to suit your needs and budget. On selected units, we can offer tailored warranty options. So whether you're looking for a late model low hour roller or something cheaper, contact us today.

Genuine **customer service.**
Unrivalled **know-how.**

SERVICE

We know that the best gear and expert advice is nothing without the right support, and that's why all Conplant equipment is backed up by our highly skilled, specialist service teams. Conplant has an enviable reputation for providing the best after sales support and we have the awards to back it. Whether it's technical support over the phone, rapid field service response to get your equipment moving, mechanical repairs or major overhaul capabilities – we've got you covered.

As the sole Australian distributor for Swiss-based Ammann compaction equipment, Conplant receives unmatched levels of technical and training support from the original equipment manufacturer – ensuring that our service teams are able to deliver superior results for our customers.

PARTS

We know that maximising your equipment uptime also maximises your project's profitability.

Our experienced parts team live and breathe compaction so when you need assistance you'll get the right advice and the right parts to keep your equipment running.

Whilst our parts business supports Ammann owners, it also supports our own hire fleet, so we're able to stock a much larger range of parts to support you. We have a multi-million dollar parts inventory throughout Australia and direct and efficient access to Ammann's international parts network so you can be confident that when you need a part, we'll have it in stock or we'll be able to get it for you fast.

Too busy during the day? Why not use our online service. This also gives you access to our parts catalogues 24/7, 365 days a year. For more information or to register, visit www.conplant.com.au or give us a call on 1300 166 166.

What you need, when you need it...
huge parts inventory held here in Australia.

DID YOU KNOW WE CAN ALSO PROVIDE YOU WITH:

- Service kits
- Filtration
- Oils and lubricants
- New engines including brands like Cummins and Deutz
- New hydraulic pumps, motors, valves and cylinders
- A selection of rebuilt and remanufactured core components
- Genuine and aftermarket options
- Tyres and wheel assemblies
- Padshell kits
- Accessories including UHF radios, revolving lights and reversing cameras

We also have a large selection of other items to suit not only your Ammann compaction equipment but other brands and equipment types. If we don't have what you need in stock, our specialist team will be able to source it or help you find a solution.

TRANSPORT

We understand how important it is for you to get the right compaction equipment, where and when you need it. With our experienced drivers behind the wheels of our fleet of GPS equipped heavy vehicles, we ensure that your equipment is delivered on time with a minimum of fuss.

Need to know something about a piece of equipment that you haven't hired from us before? Our professional drivers know our equipment inside and out and can demonstrate its functions and controls, ensuring you can get to work safely and efficiently.

At Conplant, safety is entrenched in everything we do - and transport is no exception. From stringent maintenance processes to carefully implemented fatigue management systems – we take our transport responsibilities, and yours, seriously.

INNOVATION

Don't want to be left behind in your competitor's dust? With Conplant, you'll have access to the latest technologies to maximise safety, quality and productivity.

Conplant has a proven track record of introducing new and innovative technology into the Australian market. Some of these include in-house developed technologies in direct response to our customers' challenges, whilst others leverage global best practise through our close partnership with Ammann.

Got a challenge? Contact us – we may already have the solution or we'll work with you to find one.

For more details and the latest on our innovative technologies call us today on 1300 166 166.

ROPS2

Roll Over Preventative System

ROPS2 is a Roll Over Preventative System with 2-stage warning and function management. Our ROPS2 system warns the operator when a potentially dangerous angle is detected and shuts down the roller's vibration if the angle continues to increase. If you don't like headaches, literally... you should be using ROPS2.

Winner: National Safety Award Patented technology

REMOTE CONTROL

Our system can be fitted to our full range of Ammann rollers and the machines can be used in either remote control or manned with the flick of a switch.

These machines can also be fitted with edge control automated steering systems which can be particularly effective when compacting verges next to concrete pavements. The edge control system keeps the machine the desired distance from the pavement's edge, eliminating pavement damage and the risk of the machine inadvertently wandering over an embankment. It's win, win, win... safety, quality and productivity.

If you're operating in a high risk application, our remote control and edge control automated steering systems can help you control your risk.

Winner: National Safety Award
Patent Pending technologies
Edge control still under development

Award winning technology...
at your fingertips.

INTELLIGENT COMPACTION

Ammann Compaction Expert (ACE) comes in a number of versions to suit your requirements. From basic compaction meter functions to fully automated Intelligent Compaction systems that measure soil bearing strength, instantaneously and automatically adjust compaction parameters including amplitude and frequency, and map the compaction results on your site using GPS. Whatever you're looking for to improve your job productivity and quality, we've got you covered.

Safe **plant.**
Safe **people.**

TRAINING

Over the years we've seen the difference highly skilled workers can make to your business, and we've put together a range of training programs to allow us to share our knowledge and experience with you.

Whether your people need to know how to operate new pieces of equipment safely, build roller operation competency, gain a deeper understanding of the science of compaction or gain insights from our highly qualified service personnel, we've got the skills and experience to deliver the right training for you.

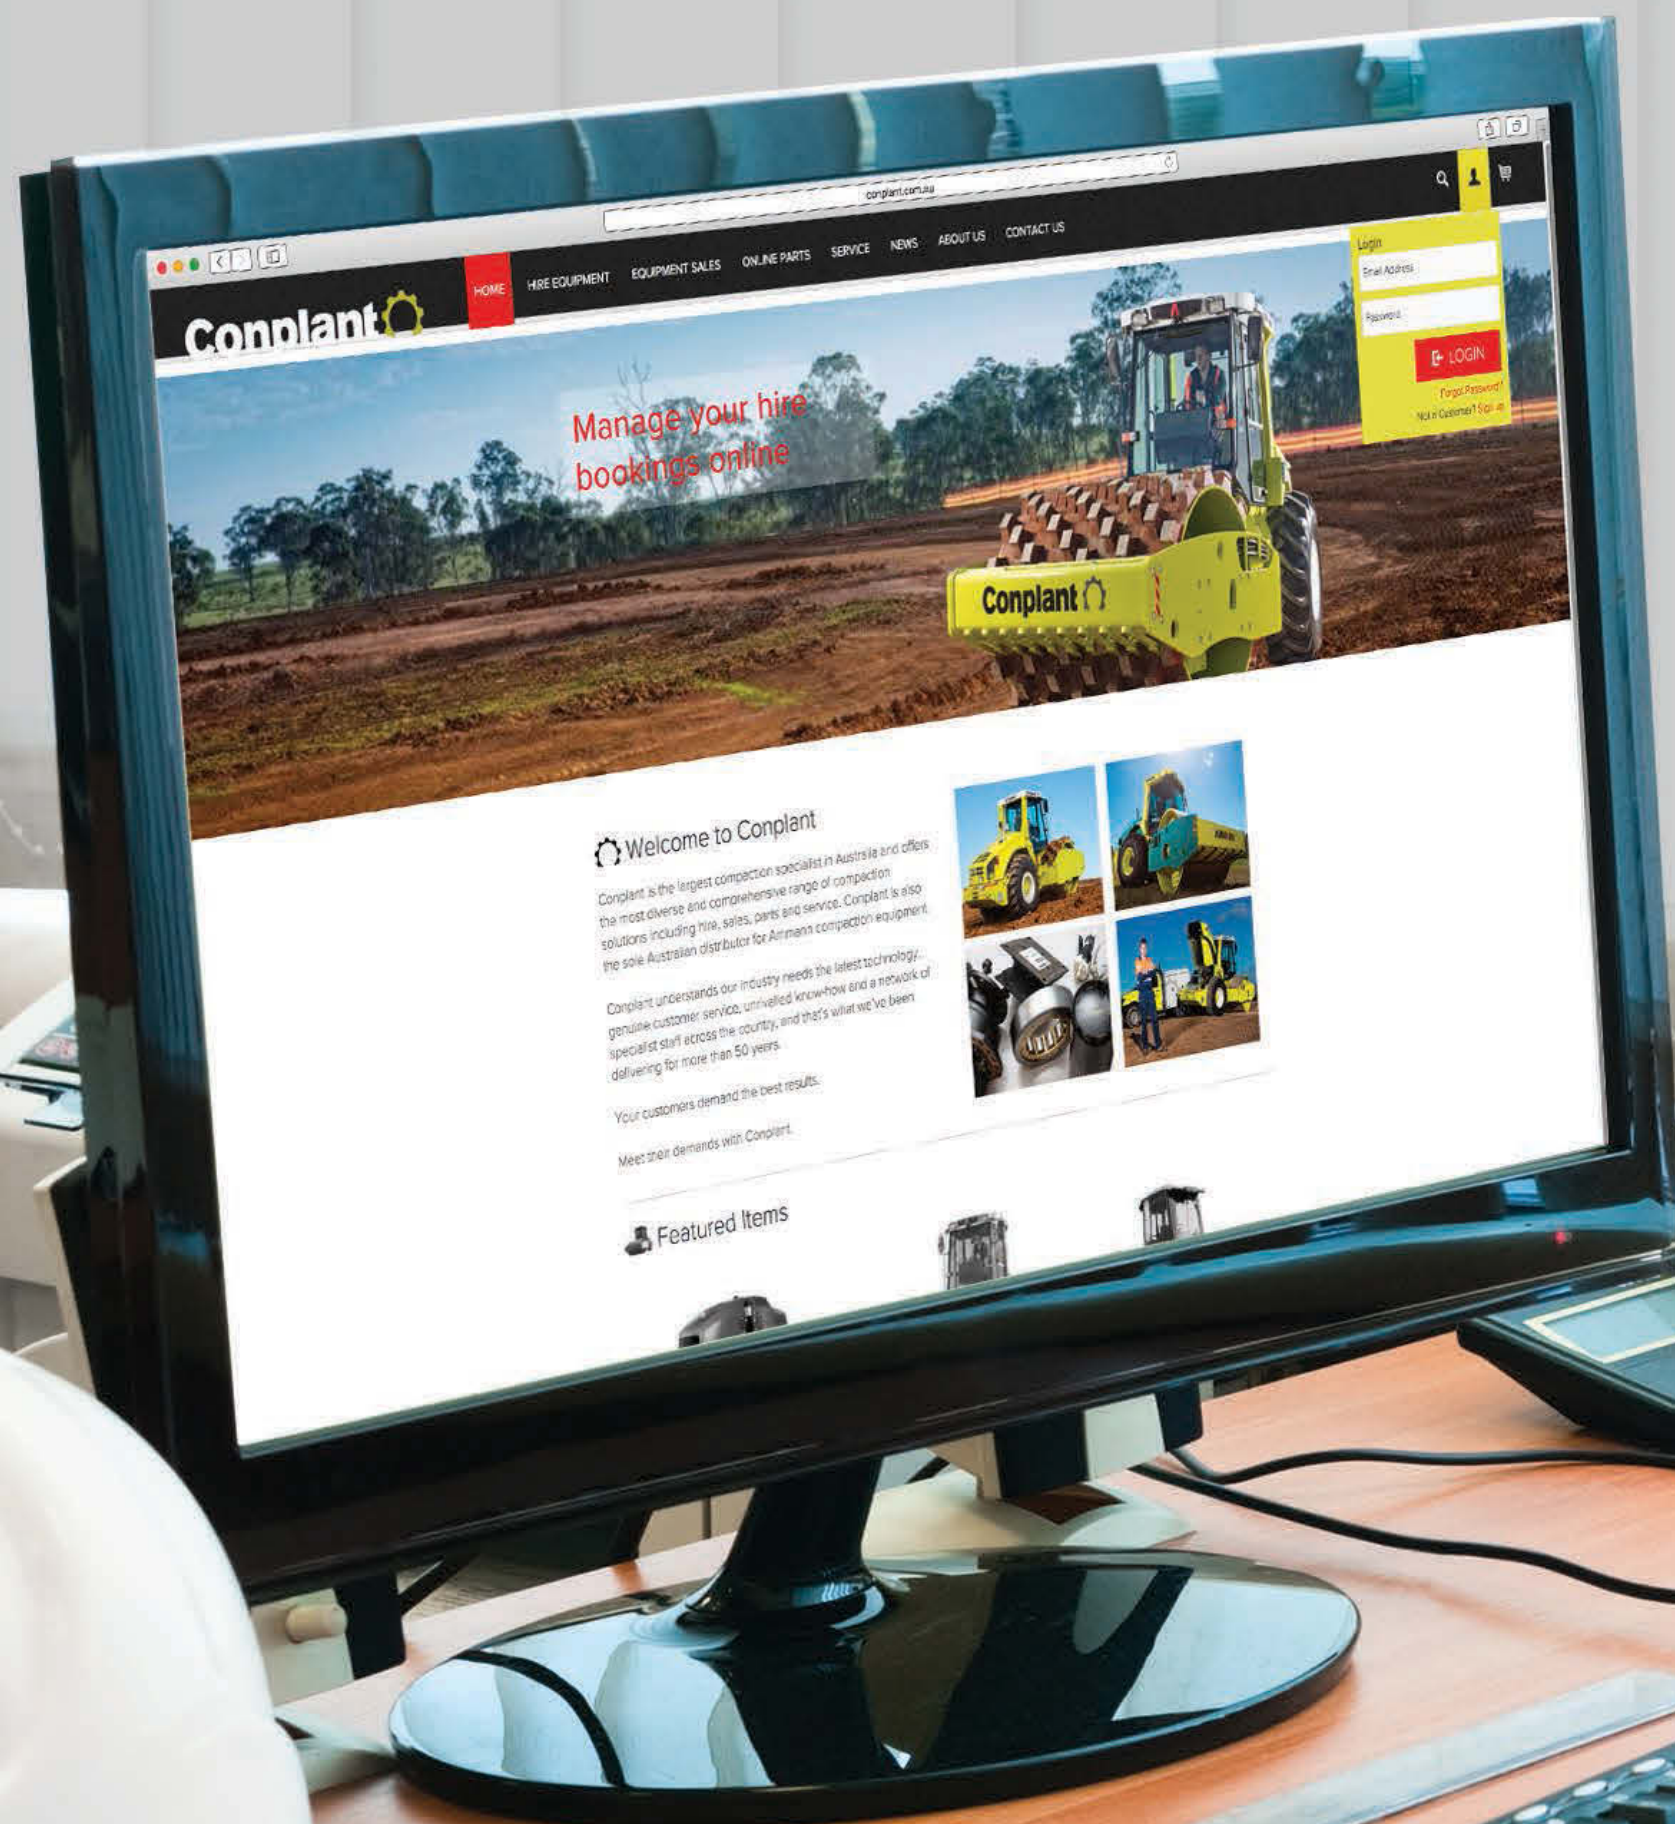

Speak with us today about tailored training, conducted on your site or ours, to ensure you're getting the maximum productivity, safety and value for money from your investments in people and plant.

- Compaction applications training
- Operator training
- Service and technical training

SAFETY, QUALITY AND ENVIRONMENT

Conplant's genuine commitment to safe plant, safe people and safe workplaces is much more than skin deep - it's intrinsic in everything that we do. As a central part of our business management process, Conplant has developed and implemented an Integrated Risk Management System that has achieved third party certification against both AS/NSZ 4801 (Safety Management) and ISO 9001 (Quality Management). This integrated approach to risk management delivers significant benefits for all stakeholders - our business, our people, our customers and our contractors, by driving continuous improvement and outstanding performance. Most importantly, this framework supports our common goal of zero harm.

Whether you purchase new or used equipment, hire rollers for your project, engage us for your transport or purchase parts to keep your equipment running, this commitment means that you can partner with Conplant with confidence. Our commitment ensures that you get what you need first time, with the features and documentation you require to ensure compliance so you can get straight to work.
