Transportable Sewerage Treatment Plants For Hire

- * SI Water provide a range of modular STPs capable of treating 18m³ to 65m³ effluent per day
- * Plants can achieve effluent qualities ranging from Classes B to A+.
- * Modular units range from 20ft to 40ft container size units: allowing ease of mobilisation to remote location's by road, rail or ship transportation

Installation requirements are simple;

- * Simple civil works footprint only requires level pad
- * 3 phase power (generator compatible)
- * Lift pump well (can be supplied if required)
- * Irrigation area (sprinkle dispersal system can be supplied if required)

SI Water has a team of Technicians available for installation and commissioning.

Remote servicing of plants can also be incorporated into the hire package.
