

Non-Destructive Excavation Services

About Us

MFS Contracting has established a strong reputation across multiple industries and our success is a direct result of our professionalism and ability to consistently deliver against our five key values:

- ▶ Immediate response to client needs
- ▶ Thorough understanding of our client's requirements
- ▶ Delivery of superior solutions
- ▶ Provide the most technically advanced equipment available
- ▶ Exceed expectations and always go above and beyond for our clients

For over 5 years MFS Contracting have worked with many large construction companies and semi-government authorities, allowing us to develop, refine and deliver a range of civil engineering and NDD service solutions. The outstanding success of these solutions has resulted in MFS Contracting being recognized as a genuine leader in construction utilities and NDD solutions. We have a passion for excellence and take pride in the quality of our work, our greatest reward is a satisfied client, it's because of that...

MFS Contracting will always go above and beyond for our clients

Our Services

Non-Destructive Digging

Non-Destructive Digging (NDD) is a safe and effective method of exposing underground utilities, using pressurised water and vacuum techniques to expose underground infrastructure without causing damage.

Technical Benefits:

- Carefully exposing underground infrastructure without damage
- Preferred method by asset owners such as Ausgrid, Endeavour and Sydney Water
- Reduces environmental impact
- Cost-effective way of identifying existing services in your work area

Our Services

Vacuum Excavation

- Our units can be used to safely remove wet and dry materials
- Tanks, pits and culvert cleaning
- Disposal or recycling of liquids or solids

Reinstating

- Reinstatement of potholed areas, using sand, roadbase and cold mix
- MFS Contracting has a wide range of equipment and can tailor a crew to meet our clients' needs. Crews come with fully equipped excavators, tippers and tool vans/tool trailers and can supply all the backfill material required for any project

We have protected underground services for our clients on the following projects

- The NorthConnex
- Lendlease Signal Work Pacific Hwy
- Ausgrid/Endeavour Distribution Works
- M1 Pacific Motorway Upgrades
- National Broadband Network
- The WestConnex St Peters Interchange
