Get reliable and affordable repair services for your forklift. We fully understand that time is valuable, therefore we place very high importance on minimising any downtime for your business.

The Nichiyu Range of Battery Electric Forklifts

Great news for Nichiyu owners and forklifts users in general. Statewide Forklifts have recently joined the Nichiyu Electric Forklift, National Dealer Network.

Increasing the opportunity to assist with you Materials Handling Requirements, with the Nichiyu product, whether it be Purchase, Rental/Hire and of course Preventative Maintenance Service.

About Us

Australian Company & Family Owned

We like to think that we provide an authentic service. A service that started off small in 1999 – with Lou working in his garage providing servicing and repairs – and has picked up to be one of the most trustworthy and reliable forklift specialists in Western Sydney and Central Coast areas.

After 4 years of managing his onsite services, Lou was joined by his brother Steve in 2002. The company picked up, with them buying their own workshop and office in Minchinbury, NSW. They continued to strive, providing their customers with the Exceptional Service & Support which, to this day, is the Statewide Forklifts mission statement.

As the company grew, so did the demand, and so it wasn't long before they needed to expand their products and services. They started by purchasing used machines for their rental fleet and for resale.

In 2008 they bought the Budget Forklifts NSW Company, which enabled them a larger service department and rental fleet.

Two years later they were expanding the business to the Central Coast in Wyong, NSW. They also bought a second factory unit to service the Central Coast and Hunter Valley.

By 2013, Lou was in charge of the Sales & Rentals, and Steve was manager of the Service Department, including 6 full time service technicians.

The company got to the position of being able to offer: new and used forklifts, fleet management, warehouse forklifts, forklift attachments, telescopic forklifts, all-terrain buggies, onsite mobile repairs and much more. Statewide now provides forklift rentals all around Australia with around 250 units and the fleet continues to grow.

The foundation of Statewide Forklifts was built on exceptional Service & Support and today the same philosophy is imprinted in every Statewide employee and in turn reflected by our large and loyal customer base.
